1. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose nor suggest coating the ceramic part of a metal-ceramic hybrid substrate by treating the ceramic area with an esterifying agent wherein the esterification of the ceramic area prevents a subsequent metal coating that is deposited from adhering to the ceramic area. The closest prior art is White, Proceedings of the IEEE, 57(9), pp 1610-1615, 1969, but White does not disclose the metallization of the integrated circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
